◆ It is more difficult to make American friends and have a good talk with them than we had expected, even if we live in American, isn't it? In my case, I have had more opportunities of speaking English than ever and could have got local news and information without delay, since I joined the IFC class. My conversation leader, Shirley lives in my neighborhood. When I was in trouble, I had headed to here and asked her help. Having American friends around me is great. I really feel secure. In the IFC, each conversation group has their own time besides every Monday morning class. They come together and do things together, like baking cakes, making crafts and sometimes even making sushi, Everyone has good time. What I really appreciated about IFC is that IFC have a nursery. When I came to American, I had some difficulties to find a place I could join with my little kids. IFC was only place where I could be allowed to bring my kids and interact with English speaking people. They babysat very well. They did it with love. Therefore, both my kids and I could not wait coming to IFC every Mondays. Why don't you have a good time in the IFC class, being apart from your children?
(Akiko Ariga)
